

Corrado Priami got his university degree and PhD in Computer Science at the University of Pisa. He was research associate at the Ecole Polytechnique (Paris) and at the Ecole Normale Supérieure, assistant and associate Professor at the University of Verona. At present, he is professor at the University of Trento. He authored more than 100 international journals and conference papers; he leads the bioinformatics research program at DIT; he is member of the governing body of the University of Trento. His research covers the convergence between computer science and systems biology with particular emphasis on the definition and implementation of integrated and uniform frameworks to model, analyse and simulate complex systems especially in the field of global computing and systems biology. He chaired many international events and was part of many program committees. He is editor in chief of the international journal *Transactions on Computational Systems Biology* and member of the editorial board of the *International Journal on Bioinformatics research and applications*. He coordinates both EU and national projects in the fields mentioned above.
